Inbox Title: 1010-AD23: Insufficient time to review advance notice of proposed rulemaking - request for 45 day extension of time
Comment: I appreciate the opportunity to comment and respectfully request an addition of 45 days to the comment period. Given concern for energy security, it is important that implications to the business are thoroughly considered and understood. This advance notice refers to an assessment of fees to routine activities and unless administered very carefully has the potential to result in business disruptions. An extension of time is therefore requested to better understand the impact and implications of this advance notice of proposed agency action.
